1 Lighting info (What is energy harvesting)

Hong Kong-Zhuhai-Macau Bridge, which opened on October 24, 2018, is the longest bridge in the world.

It is 55 kilometers long and is 20 times the length of the Golden Gate Bridge in San Francisco, USA.

Using this bridge, the road trip between Hong Kong and Macau is reduced from 3 hours to 30 minutes. About 30 kilometers from China to Hong Kong is an offshore bridge and about 7 kilometers is an undersea tunnel.

According to the BBC, at least 18 workers died during the construction period, also referred to locally as the Bridge of Death.

Product introduce: Lighting for construction work

Lighting for construction work

LED 170w cylindrical lighting suitable for indoor construction work lighting

Product Features

01. Indoor work lighting

5m ambient brightness  
100lux (10000lm)  
10000lm  
10000lm

02. Connectable

220V  
220V Connecting - up to 10 connections  
- detachable top and bottom of product

03. Portability

With 180mm battery  
Cable length 50m when using outlet  
- Hands & wheel  
110mm  
110mm  
110mm  
110mm

04. Able to separate  
- Removable top and bottom of product

Specifications

LED	Brand	Beam angle	DR	CCT	Operating temperature
Samson	1.760x30	30°	DR58 80	5.300K	-20~45°C

Power	Input voltage	Max. operating temperature	Cable length	Material	Weight
170W	AC 180-260V (120W / 220W)	2,500 x 30°	10m	Aluminum (Light, battery, remote control, 17.5kg / 3.8kg)	

Battery Specifications

Capacity	Brand	Volume	Operating time	Operating temperature
1800mAh	LiFePO4	6000ml	2~3 hours	-20~45°C

\* Operating time may vary depending on usage conditions.

Product dimensions 1030mmx450mmx310mm
