Environmental design / Installation - Actually presented with landscape lighting solution

EGM has been selected to provide lighting solutions for the city center of Seoul. The project includes landscape lighting and lighting for the city center. The project is a part of the city government's plan to improve the city's image and attract tourists.

The result of the installation of landscape lighting, which was discussed with customers in detail, is to create a sense of safety and security for citizens and to create a sense of pride in the city. The lighting is designed to be energy-efficient and to have a long life span.

Seoul City Center Landscape Lighting Installation

Seoul City Center Landscape Lighting Installation. The lighting is designed to highlight the building's architecture and create a warm and inviting atmosphere.

The lighting solution for Seoul City Center was completed in the spring of 2018. The installation was a success and the city is proud to have a modern and sustainable lighting solution.
